Got it

After Committing the account layout, the User Story shows a message indicating the last commit has no changes

The account layout on the source org had no differences regarding the destination branch

Ana added a new field to the account layout in her sandbox. After committing the account layout, the User Story displayed a message indicating that the last commit had no changes

Ana marked the Account Layout as 'Retrieve Only' in the metadata grid

Ana added a new field to the account object in her SB. After refreshing the metadata index from the commit changes page, the field is not showing on the grid.

Ana was committing from a User Story with an Org Credential different than the one for her Sandbox
